Mobile: (+33) 745 105 417 Address: Île-de-France, Créteil, 5 Rue des Bordières

## EXPERIENCE

---

|                                                                                                                                                                                                                                           |                                               |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|
| <b>Maths Tutor @ Université Paris Cité (UPC)</b><br><i>Mathematics lessons for MSc students and development of supplementary website.</i>                                                                                                 | 07.2024-03.2027<br><i>Paris, France</i>       |
| <b>Doctoral Student @ École Normale Supérieure (ENS)</b><br><i>Optimization of a coarse grained forcefield for RNA. Data analysis, machine learning pipelines with Python, Pytorch, Bash. Low-level programming with Fortran, C++, C.</i> | 03.2024-03.2027<br><i>Paris, France</i>       |
| <b>MSc Internship @ Université Paris Cité (UPC)</b><br><i>Characterization of binding sites for augmented reality visualization with Unity/C#.</i>                                                                                        | 03.2023-02.2024<br><i>Paris, France</i>       |
| <b>Organic Chemistry Tutor @ Costa Rica Institute of Technology (ITCR)</b><br><i>Organic chemistry lessons for BSc students.</i>                                                                                                          | 07.2017-11.2018<br><i>Cartago, Costa Rica</i> |

## EDUCATION

---

|                                                                                                                                                                                         |                                               |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|
| <b>PhD in Computational Biophysics @ École Normale Supérieure (ENS)</b><br><i>Optimization of a coarse grained forcefield for RNA.</i>                                                  | 03.2024-03.2027<br><i>Paris, France</i>       |
| <b>MSc in Quantitative and Computational Biology @ Università degli Studi di Trento (Unitn)</b><br><i>Characterization and visualization of binding sites. 30L/30 with distinction.</i> | 09.2021-12.2023<br><i>Trento, Italy</i>       |
| <b>Exchange Program @ Technical University of Munich (TUM)</b><br><i>Organic chemistry and molecular biology courses.</i>                                                               | 04.2019-09.2019<br><i>Munich, Germany</i>     |
| <b>BSc in Biotechnology Engineering @ Costa Rica Institute of Technology (TEC)</b><br><i>Algorithm development for metabolic flux comparison. 100/100 with distinction.</i>             | 02.2016-09.2021<br><i>Cartago, Costa Rica</i> |

## COMPETENCES

---

### Experience with Software:

- **High:** Python, Bash, Git.
- **Intermediary:** LaTeX, Markdown, HTML, Javascript, CSS, Fortran, C, C#, C++, Java, Kotlin, regex.
- **Beginner:** Batch, R, MATLAB, Tcl, Rust, Lua, GLSL.

### Languages:

- **Proficient:** Spanish (native), English (C1.2), Italian.
- **Basic:** German, French.
